Per Eleanor's suggestion I went ahead and created a "revision 2" copy of Bo's summary by "accepting" the changes in my edited version from earlier today. In the rev 2 copy I also added a few more changes in blue text. I believe I've addressed (or attempted to) the main comments of Eva and Dan from the main text of the memo. I didn't, however, do anything with their comments/questions in the last "study topics" section.

A couple of comments, most of which are not actionable, added to Eva's comments.

I'm looking at this summary again this morning and will try to address as many of Eva's comments as I can.

Hi All,

Attached is the summary that Doug and I came up with. I also added an outline and made some edits to make the memo a little more readable. That is also attached. Please comment on/edit the summary to make it more understandable. We added some interpretative language that does not appear in the memo to get the point across although held back adding that these time estimates are still optimistic as they assume the degradation goes flawlessly.
